

INVENTORYWORKS

We help small businesses reduce time and labor on manual inventory management

Our software solution is designed to simplify and streamline inventory and production management for small businesses. Built within the Salesforce platform, our user-friendly solution offers robust features and key benefits that enhance efficiency and inventory visibility across the entire buy, build, and sell process.

KEY FEATURES:

Inventory Management

- Bill of Materials Management
- Vendor Management
- Purchase Order Management
- Production Management

BENEFITS

- Reduce time and labor of managing inventory transactions manually
- Provide real-time inventory visibility to sales, service, and operations teams
- Reduce stock outs and optimize inventory levels
- Simplify the purchasing process
- Leverage the Salesforce platform
- Reduce the number of systems needed for business operations

BEST FIT FOR BUSINESSES

- Using Salesforce Sales or Service Cloud (Enterprise+)
- Buying, selling, and optionally building physical products
- Single warehouse configurations
