InventoryWorks 1.3.0 Release Notes

Published 1/27/2025

This document includes changes in release version: InventoryWorks/January 2025 1.3.0

- A Purchase Order Path has been created to show the progress of a Purchase Order during its lifecycle.
- An inventory summary record will automatically be created and set to qty 0 when a new product is created.
- Inventory Summary fields have been set to Read-Only on the included Page Layout since they are calculated fields and should not be modified.
- Bug fix: Purchase Orders will now start in the "New" status rather than the "Placed" status.
- Bug fix: In some cases, when the Fulfilled Date on an order product line item was deleted, the corresponding inventory log transaction was not deleted.
